

Alissa Mazzocchi

Response questions

1. One time is basically about being in a typical teen relationship. When you're younger and you thought it was love, but then later on you realize it's just puppy love. The song title I think means remembering that one time you were in love with someone that you thought was the one. I think it also means remembering the time that someone gave them a chance.
2. I totally agree with the statement that the artist is trying to make. So many of my friends and me thought we've been in love with a guy/girl that ended up being nothing. We all thought we were in love and would do anything for them to make them like us. I think mostly everyone can say they've experienced that time they've seen someone and fell completely head over heels in love. I know I've personally felt the butterflies in my stomach when I have liked someone so much they just don't go away.
3. In a couple paragraphs there are rhyming patterns. In one paragraph it is set up in a four line stanza. The first line rhymes with the third line and the second line rhymes with the fourth line. In this song there are also a lot of repeated words and phrases which I think emphasizes the meaning of the song. The genre of this song is hip hop. This song mostly attracts to teen girls because it's about being in a puppy love teen relationship. The song is very upbeat and I think the lyrics fit with the statement that the artist is trying to make.
